SUMMARY

Business Intelligence Analyst with expertise in Power BI, SQL, Python, Excel, Power Query, and Databricks, delivering business intelligence solutions that improve decision-making. Experienced in developing interactive dashboards, performing data analysis, data modelling, data cleansing, and KPI reporting to transform complex, multi-source data into actionable business insights. Skilled in translating business requirements into scalable reporting solutions, improving data quality, and supporting strategic and operational decision-making through data visualization, automation, and analytics.

WORK EXPERIENCE

Freelance Data Analyst

Jan 2024 – Present

- Delivered analytics and reporting solutions for 10+ organizations across sales, logistics, NGOs, government, and service industries, enabling data-driven business decisions.
- Built 10+ interactive Power BI and Excel dashboards for KPI monitoring, executive reporting, performance analysis, and business intelligence.
- Cleaned, transformed, validated, and modeled complex datasets using SQL, Power Query, Python, and DAX, improving data quality, reporting accuracy, and analytical consistency.
- Collaborated with stakeholders to translate business requirements into scalable dashboards, automated reporting solutions, and actionable insights that supported strategic decision-making.

GlobalShop International

- Developed a Power BI dashboard analyzing ₦179.7M in sales across 500+ customers, 90 products, and 5 cities, improving KPI visibility and decision-making.
- Built a scalable data model using Power Query and DAX, improving reporting accuracy and consistency.
- Created interactive dashboards tracking sales, revenue, profit, inventory, and customer performance to support business insights.
- Automated reporting workflows using Power Query, improving data quality and reducing manual reporting effort.
